DETAILED ACTION

Response to Amendment

1. The preliminary amendment filed on 31 August 2006 has been accepted and entered.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1 has been amended to fix a typographical error:

"...wherein the ADC has a [[different]] **differential** MOS input stage..."

Claim 18 has been amended to fix a typographical error:

"The sensing device of claim [[7]] **17**..."

Allowable Subject Matter

3. Claims 1 and 12-20 are allowed.
4. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, Fowler *et al.* (5,461,425) shows pixel elements comprising a light detection element and an A/D converter, but fails to show the use of such an arrangement used with a passive infrared detector (column 2, lines 46-54). It would not have been obvious to one of ordinary skill in the art at the time the invention was made to make a modification of this type. Further, the

passive infrared detection system of Baldwin *et al.* (5,764,146) fails to show a passive infrared sensor connected directly to a differential MOS input of an A/D converter, but instead includes an intermediate bandpass amplifier (Fig. 6).

Claims 12-20 are allowable for reasons of dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
